<b>Space, electricity and water requirements</b>	<b>YES / NO</b>
Free wall space of min. 50 x 60 cm?	
Is a 220V socket with protective earth present and available?	
Is the maximum distance to the socket 150 cm? Ideally also at a sufficient height so there is no splash hazard.	
Is a water connection present and available with water tap and 3/4" connection.	
Is the maximum distance to the water connection 100 cm? For your information, the water hose for supply is 121 cm.	
Is there a sink or pour-out sink? This is more practical for filling the vials and prevents damage after leaks.	
Photo of the current situation You may also send this as an attachment by e-mail.	

*Only when all questions can be answered "Yes" is the room suitable for installation. An appointment for installation can then be made.*
