

The **international** certification 'Air Label Score' guarantees the best information on the **emissions of products** into indoor air. Each product tested receives a score from **A+ (very low emissions) to C (high emissions)**.

The issue

85% We spend more than 85% of our time indoors.

8X Indoor air is 8 times more polluted than outdoor air.

-21% Up to 21% productivity loss of employees working with poor air quality.

Upcoming regulations on indoor air quality.

Why?

Air has the **main** impact on health.

83%
Air

17%
Water & Food

Mission

To reduce the impact of indoor air pollution on public health.

Advance in ISO 26000 CSR

Protection of cleaning agents

Protection of the cleaned premises' occupants

Prevent pollution by reducing emissions

Protecting consumer health

3 GOOD HEALTH AND WELL-BEING

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

11 SUSTAINABLE CITIES AND COMMUNITIES

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Potential sources of pollution

It's impossible to know a product's emissions without having it tested in a laboratory. Air Label Score guarantees the best information on the emissions of products into the air.

Comprehensive, simple, fast procedure

Analyses

- » Conducted by independent and accredited laboratories.
- » Scenarios defined according to normal product use and ISO 16 000 standards.
- » Complete screening.

The most stringent standards

- » +125 international standards integrated.
- » Results compared to the most stringent existing exposure limits.

The guarantees

A **consistent, clear** and **uncompromising** score.

Total **independence**.

A **quality** label.

A **transparent & scientifically recognised methodology**.

Annual quality **controls**.

CERTIFICATE N° : AL2021WMPB04

This certificate is issued by Air Label Score to the holder to certify that the above reference has been rated A+ for professional usage.

DATE OF ISSUE	TITULAIRE	BY AIR LABEL SCORE
<p>11.11.2025</p> <p>Valid 1 year renewable</p>	<p>SA Werner & Mertz Benelux</p>	

Air Label Score **gives each product tested a score** from A+ (very low emissions) to C (high emissions) representing the emissions of the product.

The tests were carried out in emission chamber by an **accredited laboratory** and are carried out on the basis of the protocols established by the NF EN ISO 16000-3, 16000-6, 16000-9 and 16000-11 adapted standards.

All the Volatile Organic Compounds emitted by the product are identified and quantified. They are then compared with the emission limit values from more than 125 international organisations.

To obtain an A+ rating for professional use, each Volatile Organic Compound must **comply with the strictest emission value** from these bodies. Scores and limit values are updated annually.
