

# Floor cleaning and maintenance with only water

The solution for environmentally conscious floor maintenance

Brilliant floor pads with a top layer of diamonds for stripping, cleaning and polishing with only water. A surprising result without chemistry!

- > EXCELLENT RESULTS
- > ENVIRONMENTALLY FRIENDLY
- > SAFE IN APPLICATION AND USE
- > COST SAVING
- > SUITABLE FOR ALMOST ALL FLOORS

### Working method marble natural stone / marble composite tile

Use the Upgrade pad #1 for (deep) cleaning. The result is a clean and open floor. Then the Upgrade pad #2 is used for closing the floor with light cleaning. Use the Cleaning pad for a completely closed and glossy floor. The Cleaning pad is also the pad for the maintenance of a marble floor.

Upgrade pad #2  
Cleaning pad

### Working method marmoleum (lino)

Use the Strip pad #0 for stripping. A protective layer can be placed immediately after stripping. For cleaning, keeping the floor closed, maintenance and maintaining the gloss of floors with protective coating, use the Cleaning pad under a scrubber drier or single disc machine as required on a daily or weekly basis. The Cleaning pad can also be used dry under a high speed or ultra high speed machine. The result is a shiny but slip-resistant floor.

Cleaning pad

### Working method rubber and PVC flooring

Use the Cleaning pad for daily maintenance. If there is a backlog in floor maintenance, scrubbing the floor with the Upgrade pad #2 is sufficient. The Cleaning pad can also be used dry under a high speed or ultra high speed machine. The result is a shiny but slip-resistant floor.

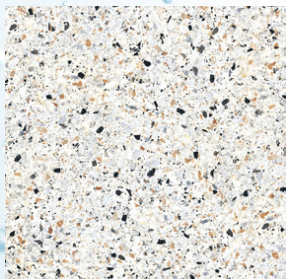

Upgrade pad #2

### Working method ceramic tile

Use the Upgrade pad #1 for scrubbing in case of a backlog in floor maintenance. For maintenance of the floor as required, daily or weekly, scrub the floor with the Cleaning pad.

### Working method terrazzo

Use the Upgrade pad #1 for (deep) cleaning. Then the Upgrade pad #2 is used to close the floor with light cleaning. Use the Cleaning pad extra for a completely closed and shiny floor. Because of the unique diamond mixture, the Cleaning pad extra is extremely suitable for carrying out maintenance of intensively used large surfaces in the retail environment.
